

FLEET TRACKING DEVICE

The AT400 is an OBD-II compliant, plug n' play, fleet tracking device. It is capable of 24/7 web-based continuous tracking. This real-time device is available with our 1, 2 and 5 minute rate plans.

Our easiest device to install, it plugs into an OBD-II port of the vehicle. The port can be maintained with a special adapter. For other tracking options, See AT 370, AT 390, and AT600 for control, and sensor options, AT550 for cold chain. See AT 312, and BAT 60 for asset tracking.

Target Markets:

- Most general businesses, and individuals especially those that do not require starter disable **and** unlock
- Easy install, basic functionality

AT400 Benefits

- Plug n' play in newer vehicles
- Basic store-and-forward capacity
- Internal GPS/cellular antenna
- Extensive reporting options
- 1,2,5 min tracking options on the AlphaTrak Portal

Memory retains 180 locations for store/forward capability

Over the air firmware updates

Green Flash	GPS connection
Orange Solid	Ignition sense

Electrical OBD-II

AlphaTrak is your best solution for tracking vehicles and assets across North America. The personal web portal is easy to use, and provides owners and fleet managers the ability to track vehicles real-time, but optionally control ignition and door locks, as well as monitor key functions such as plows, lift-gates, and more.

Alphatrak can also alert you via SMS and IVR access when vehicles and assets exceed speed parameters or leave pre-determined areas. Detailed reporting helps owners to manage better, protect against liability, and save on vehicle insurance. Alphatrak can pay for itself in savings.
